

# Alumwell Nursery Garden Adventures

Session 1 - visiting our new allotment and  
planting our first vegetables and fruit

Here is our new allotment.

We collected some soil. It was a bit damp in the allotment today so we needed wellies and coats on.

We decided to do our planting uncover today as it was very wet.

We planted onion sets and garlic.

We had to make sure we got our onion sets and garlic the right way up.

We planted our onion sets into the ground in paper pots. The paper is biodegradable so it will break down into the soil.

We also planted some strawberry plants. We had to dig a hole and then tap the strawberry plant out of its pot. We made sure all the roots went in the earth and leaves stayed on top of the earth.

Our strawberry plants are all planted out.

We also did some weeding of things that had started growing that we didn't plant.
