Dear Parents/Carers,

"Strawberry Quick" - Drug Awareness

We have some important information to share with you from both West Midlands Police and the Safeguarding Coordinator for Education and Early Years.

There is a new and scary drug going around. It's a type of crystal meth that looks like strawberry pop rocks (the candy that sizzles and 'pops' in your mouth). It also smells like strawberry and it's being handed out to children at School.

They are calling it "Strawberry Meth" or "Strawberry Quick". Children are ingesting it, thinking that it's candy, and then being rushed off to hospital in dire condition. It comes in various other flavours, including, chocolate, peanut butter, cherry, grape and orange.

Please instruct your children not to accept candy from a stranger or even from a friend as they may have been given it, believe it to be candy and then decided to share.

We hope you can help us by raising awareness of this and hopefully prevent any future tragedies. Please share this information with your children, family and friends.

A photograph of the drug has been shared with us, you will see that it looks very appealing to children but is very unsafe.

Your Sincerely

Mrs Armela Patel
