

This term we have been exploring what autumn has to offer. Blue group have investigated the autumnal changes outside and brought a sense of autumn to the inside.

We took a trip down to the forest where we made some autumn nature wands to mix our magic potions together. We also investigated the animals living in the forest. The children learnt a new word 'habitat' to describe where the animals and insects live.

Earlier on in the term, we had a visit from the owl babies who were looking for somewhere to stay.

The children really enjoyed making a nest for them and looking after them until mommy owl came back. We explored a variety of different materials to make the nests and thought about what the owls would like. Some children chose to add some leaves to make it soft and warm for the owls. Some children chose to add sticks for the owls to perch on. Some children chose to add some autumn colours to make it look nice for them so they would want to stay. We researched some facts about Owls to help us decide what to make for them.

This term we have raised some money for Children in Need. The children came in their own clothes and donated money to help those in need.

We had lots of fun activities to do on the day to celebrate. They enjoyed mixing and spreading the icing as well as sprinkling the decorations on to make Pudsey spotty biscuits. They loved eating them even more.

We have also been learning about light and dark in preparation for the dark nights.

We have been testing out our new light dome, exploring how light can change and enhance colours and shapes. We have used this to make an underwater castle and tell some stories with the dragons.
