

# Orange Group

## Maths Stay and Play

Orange Group had a great time exploring all areas of maths in the environment. The children played with shapes on the light box and created lots of different patterns, some that were long, some that were short and even symmetrical shapes and patterns.

Parents had a fun time taking part in these activities with their children, and learning new ways to make maths enjoyable.

They looked at numbers recognition in lots of different way, through puzzles, games and even whilst playing darts.

The children and parents explored shapes in various sizes, quantities and colours.
