Maths Stay and Play

We enjoy creating a rich learning environment for our children at Alumwell Nursery by making learning FUN!

Provide playful opportunities for children to explore 'lots', 'more', 'not many' and 'not enough'.

Counting Aloud

Building structures, using imagination and problem solving

Recognising Numbers

Attempt To Match Shapes With Space

By allowing parents to see how easy it is to expose children to maths as early as possible helps them to be playful and hands on alongside their children, whilst using everyday real objects to explore maths.

Select and match various shapes to create their own piece and making connections with space, shapes, patterns and similarities

Using dough is a creative way to teach maths to our young children. It allows them to be hands on with their masterpieces, exploring their ideas and generating those 'What If' questions.

Sharing picture books showing objects of different sizes, numbers and colours.
