Session 6 - Planting chitted potatoes
and sowing carrots

Today we planted out our seed potatoes. We looked carefully at them and could see shoots growing so we knew we could plant them into the special potato bag.

We filled up lots of little plug pots to plant our carrots in. Carrot seeds are very fiddly so we made a hole in the soil in our pots and then used a stick to collect a few seeds on the end to plant into the hole.

Next we needed to do lots of watering because it hasn't rained very much and all our plants are getting thirsty.

We also planted some of our daffodils out into the tyres into the playground. When we took the bulbs out of the pots we saw lots and lots of white roots all tangled together.

We planted the bulbs into the tyres and then gave them plenty of water.
