

Alumwell Nursery Garden Adventures

Session 10 - Carrots and tomatoes

Today some parents came to help us and have a look around our allotment.

We had some tomatoes to look after. They needed watering and also some sticks to support them as they grow up.

The parents helped us with the watering, everything in the allotment was very very thirsty.

We also had lots and lots of little tiny carrot plants that were getting very crowded in their pots.

We needed to very carefully try and separate them and plant them in the vegetable bed with lost more space.

They needed very gentle watering because they are so small.

And then
everything else
needed lots and lots
of watering.
