

Red Group 2025-26

Starting Nursery

As always, it has been a very busy start to the new school year. In Red Group, we have welcomed back some old friends from last year as well as meet some new friends. It has been very pleasing to see everyone settle in so quickly.

The children have quickly shown that they are eager to explore and learn. Some of us love small world play and playing with the cars.

Others love the outdoors, and especially the climbing frame and slide.

Being creative can be a messy process, especially when we use the paint!

Red group have quickly shown that they have a great enthusiasm for cutting and sticking. Some of our friends spend a very long time making their lovely pictures.

The water area is always popular, and the children love to fill and pour and splash.

Working in the sand can be a great source of learning. In the wet sand the children like to construct sand castles (and then knock them down again).

The dry sand can provide a different sensory experience as the children carefully fill and pour and measure.

Everyone loves the playdough, and will roll, squash, and squeeze the dough to make all sorts of wonderful creations

We are very lucky to have our own Forest School. The children love to be outdoors and exploring the natural environment.

This might mean collecting leaves, flowers and seeds to create our "magic potions", getting busy in the mud kitchen, or painting with the mud.

We are also able to visit a much larger Forest School next door. It was the perfect place to go for an early Autumn walk.

The children found apples growing on the branches and discovered that the leaves were beginning to change colour and fall from the trees.

They couldn't resist the opportunity to create more potions in the bird bath.
