

We have shared the story "We're going on a Bear Hunt" and been on our own Bear Hunt in the school garden. It meant that we had to go through water, mud, a forest and a snowstorm as well as reciting the words to the story as we travelled along. It was great fun!

We have also read the story "Owl Babies". This led to us creating a tree and a cosy nest for the owls. The table was turned upside down with the legs acting as branches. The nest was created by collecting materials from around the nursery. The children worked with great enthusiasm and interest and the end results were amazing.

The end of October brought Halloween. This provided an opportunity to make our own pumpkin lanterns. The scooping out of the flesh and seeds of the pumpkin provides a great opportunity to develop motor skills, as well as being great fun.

Our Diwali celebrations took the form of a wonderful dance workshop when a lot of fun was had by everyone.

Cooking has been a very important part of our curriculum this term. So far, we have made pizzas, potato wedges, biscuits, and cakes. There is a lot of learning to be had, but the best part is always the eating!
