

BLUE GROUP 2025

Autumn Term 1

Settling into a new year, new environment, new group, new friends and new routines. It's been lovely to see how each child has walked into blue group over the last few weeks.

Friendships are developing, sharing and turn taking is becoming a much easier part of blue groups daily learning.

The children are exploring the new environment and learning new skills every day.

We have enjoyed the outdoor environment with Ms Lucy and working on the school allotment finding all the juicy tomatoes.

A Walk to our Forest School.

Forest School is a place where we run, hide and find lots of natural objects, which we use to build, create and allow our imagination to flourish. We even found a ladybug and a spider.

The children have enjoyed using their independence throughout their daily routine and have been willing to try new activities at nursery, whilst building their confidence on the activities they are familiar with.
