Expressive Arts and Design (EAD)

The colour monster has supported their creativity through colour recognition , discussing feelings and using colours to represent different emotions.

This term we have been exploring the theme of autumn through a range of creative activities. A few activities we have been making, hedgehogs using playdough, creating autumn shakers and exploring the colour monster. These activities support the area of expressive arts and design as children have the opportunities to experiment with different materials, colours, textures and express their own ideas creatively.

Through these experiences, the children are developing confidence in expressing themselves, making choices, exploring materials and their imagination.

This term we have also looked at a range of creative activities, including leaf printing, conker printing and stem colour mixing.

Expressive Arts and Design – giving children opportunities to explore natural materials, experiment with colours and express creativity.

Children were also encouraged to make choices, talk about their creations and develop confidence in expressing themselves through art.

Children have explored different shapes, patterns, and textures.
